Fermin González Blanco

tlf (+0034) 981 22 52 67
correo@ferminblanco.com

Lecturer in Construction Systems III and
Construction Workshop III .
Director of Timber Seminar. le University.

Lecturer in Master´s in Restoration. Architectu-
re. UDC University of Coruña.

PhD in Architecture UPM Madrid , B.Arch ETSA
of Valladolid .

Fermín González Blanco received his PhD in ar-
chitecture from the UPM Madrid ES (2010) and
graduated as an architect from the ETSA of Va-
lladolid ES (2002).

He started his professional career working with
the architect Manuel Gallego (2003-06).

In 2006 he set up his own architecture office.
During this time he has organised exhibitions,
he has given courses and conferences relating
to architecture, education and industrial de-
sign in various organizations and institutions.

As a result of his commitment to research,
construction and teaching, he patented LUPO
SYSTEM in 2008. Lupo is a modular system for
teaching objectives, which is produced in diffe-
rent versions (materials) and scales.

The projects carried out by his office combine
components of research, construction and de-
sign. That is why, at times it can be difficult to
categorize them according to a single area. The
projects are carried out in collaboration with
different organizations and companies.
This relationship between theory and practice
is central to the whole.
